Art Unit: 1616

RESTRICTION INTO GROUPS

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 65-70 and 76-79, drawn to compositions and uses thereof wherein S = pyranose, classified in class 549, subclass 356.
 - II. Claims 65 and 76-79, drawn to compositions and uses thereof wherein S = furanose, classified in class 549, subclass 505.
 - III. Claims 71-73 and 76-79, drawn to compositions and uses thereof wherein S = oligonucleotide, classified in class 536, subclass 22.1.
 - IV. Claims 74 and 75, drawn to compositions that are cell membrane permeable and have a logP above 0, classified in class 424, subclass 1.69.

Note: Claims appearing in more than one group will be examined only to the extent that they read upon the elected invention.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the various compositions may be used for imaging. In addition, Applicant has claims directed to a radio opaque and a cell membrane permeable substance.

Art Unit: 1616

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

ELECTION OF SPECIES

4. Claims 65-79 are generic to a plurality of disclosed patentably distinct species comprising various compositions as set forth above that contain substituents ranging from an alkyl to arylamido group (for example, see the definitions of the variables X, L, and S as set forth in independent claims 65 and 71). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Note: *The Examiner respectfully requests that the Applicant assign each variable the appropriate value when electing a species (i.e., X = methyl; S = furanose; LY = alkyl; etc.) and state which claims are drawn to the elected species.*

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1616

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (703) 308-4640. The examiner can normally be reached on Mon.-Fri. (alternate Mon.), 6:45 a.m. - 4:15 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose' Dees can be reached on (703) 308- 4628. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4556 for regular communications and (703) 308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
